

## TOP SERIES NEWS

Dear Customer,

GI.BI.DI., always attentive to the needs and requests of its customers, has improved one of its most successful products:

the linear hydraulic operators of **TOP series**.

We have made **two** changes:

- ✚ an innovative seal, that reduces the friction during the movement of the rod in chromium-plated steel
- ✚ a new special self-lubricating treatment inside the ram cylinder to reduce the frictions, improve the slide and increase the noiselessness of the product, what's more already at the highest levels in the market.

You will find these improvements on all TOP operators starting from today **16th May 2011**.

Please note that the purchasing codes are the same.

*...GIBIDI grows up and gets better with you...*

Best Regards

**GI.BI.DI SRL**
